

Delivering Excellence Since 1993

Cillages is a leading Project Management Consultancy specializing in industrial, commercial, residential, institutional, infrastructure, township, and mixed-use developments.

- By integrating globally recognized **Project Management Techniques, Agile practices**, and proprietary digital capabilities through the proprietary **C2M Platform**, Cillages enables efficient project execution, enhanced collaboration, transparent governance, and data-driven decision-making throughout the project lifecycle and beyond.

- Today, Cillages is transforming the built environment by incorporating **Artificial Intelligence (AI)** and **ML (Machine Learning)**, converting limited BMS into manageable **Smart Automation, 5D BIM, Digital Twins**, and **Connected Technologies**, helping clients develop intelligent, sustainable, and future-ready assets with increased maintenance life thanks to predictive maintenance by **Cillages One**—the proprietary **Unified Command Centre**, making mixed use **Complexes – INTELLIGENT**.

A wide-angle photograph of a city skyline, likely Dubai, with numerous skyscrapers. A thick layer of white fog or low-lying clouds fills the lower half of the image, partially obscuring the buildings. The Burj Khalifa is prominent in the center background. The sky is a clear, pale blue.

BUILDINGS ARE GETTING SMARTER...
MANAGING THEM IS BECOMING MORE COMPLEX

+

TODAY'S REALTY

TECHNOLOGY EXISTS - INTEGRATION DOESN'T

Fragmented Systems

Elevators → Separate App
Security → Separate Dashboard
Energy → Separate Software
Visitor → Separate Platform
Parking → Separate Login
Facility → Separate System

No Central Intelligence

Modern buildings rely on multiple independent systems that operate in isolation. Each platform requires separate monitoring, management, and maintenance, resulting in fragmented operations, inconsistent data, delayed responses, and increased operational complexity. Without a unified ecosystem, organizations struggle to achieve efficiency, visibility, and seamless control across critical building functions.

Key Challenges

- Multiple Commands Required for action
- Delayed Decision Making
- Limited Data Visibility
- Dependency on Manual Supervision leading to errors
- No Predictive Intelligence

DESIGNED FOR EVERY LIFESTYLE

From homes to enterprises, Cillages One creates intelligent, connected, and secure Spaces for everyone.

RESIDENTIAL

COMMERCIAL

HOSPITALITY

HEALTHCARE

ONE PLATFORM • EVERY SPACE • EVERY GENERATION

Smart Automation for Every Environment

Family to Large Townships

- Smart Lighting & Climate Control
- Home Security, safety & CCTV
- Voice-Controlled Automation
- Premium Comfort & Convenience
- Integrated with Central Command of Township

Senior Citizens

- Emergency Assistance
- Voice Control
- Remote Monitoring
- Safe & Independent Living

Hotels

- Smart Guest Rooms
- Digital Concierge
- Energy Management
- Enhanced Guest Experience.

Commercial & Offices

- Smart Office Automation
- Energy Optimization
- Centralized Monitoring
- Improved Productivity

INTRODUCING CILLAGES ONE

One Platform

A single unified command centre integrating all building systems — lighting, HVAC, security, life safety, energy, elevators, mechanical/ electricals and more — into one seamless interface.

One Dashboard

Monitor and control every intelligent system across your building from a single real-time dashboard with full visibility and instant control.

AI Powered

Machine learning algorithms deliver predictive alerts, automated responses, and intelligent optimization across all connected building systems.

UNIFIED SYSTEM FOR INTELLIGENT SPACES

IoT Enabled

Seamlessly connects all IoT sensors and smart devices across the building infrastructure for continuous real-time data and automation.

Real-Time Monitoring

Live monitoring of all systems with instant alerts and predictive maintenance insights, ensuring zero downtime and maximum efficiency.

POWERED BY TECHNOLOGY. DRIVEN BY INTELLIGENCE.

Cillages One combines global technology, intelligent automation, and connected building solutions to create secure, efficient, and future-ready environments across residential, commercial, hospitality, and enterprise spaces.

GLOBAL TECHNOLOGY PARTNERSHIP

- Technology Partner– **Lumi Electronics Germany, Intel, Samsung, Qualcomm**
- Globally trusted automation solutions
- Advanced hardware and smart devices
- International quality and reliability
- Future-ready intelligent infrastructure

SMART & SECURE OPERATIONS

- Security Monitoring
- Access Control
- Energy Management
- Centralized Control
- Remote Access
- Intelligent Alerts

TRANSFORMING SPACES INTO INTELLIGENT ECOSYSTEMS

Connecting people, technology, and infrastructure through one unified automation platform that enhances comfort, security, operational efficiency, and sustainability.

AI-POWERED INTELLIGENCE

- Unified Building Automation
- Real-Time Monitoring
- Smart Analytics & Insights
- Workflow Automation
- Facility Management
- Auto Trigger for Risk Response

ONE UNIFIED PLATFORM

A single intelligent platform that seamlessly connects lighting, security, climate control, energy, access management, and facility operations into one centralized ecosystem for effortless monitoring and control.

Building the Future with Intelligent Automation, Connected Experiences & Sustainable Innovation.
